Buy Ibrutix (Ibrutinib 140 mg)

Ibrutix tablets, for the treatment of mantle cell lymphoma, are available for purchase over the counter. The drug containing ibrutinib is recommended for the fight against severe stages of cancer. Tablets manufactured by Beacon Pharmaceuticals are prescribed for adult patients, possibly for pregnant and lactating women. Before buying Ibrutix, please consult with your oncologist.

Ibrutix price (ibrutinib 140 mg)

Beacon Pharmaceuticals, which is based in Bangladesh, received the right to manufacture a drug containing ibrutinib - Ibrutix from the World Health Organization in 2016. The original product - "Imbruvika", developed by American pharmacologists of the Pharmacyclics company, has been used since 2014. The original passed all stages of clinical trials, which allows the Bangladeshi manufacturer to skip the research phase of production, as Ibrutix is fully compliant with the anti-cancer agent Imbruvik. This significantly affects the price of Ibrutix, making it affordable for patients. The pharmacy price is also influenced by the direct supply agreement with a Bangladeshi manufacturer.

Reviews for Ibrutix (ibrutinib 140 mg)

Studies of the original drug have shown that the active agent of the drug, ibrutinib, has an inhibitory effect on Bruton's tyrosine kinase, reducing the number of B-lymphocytes responsible for the development of lymphoma. In addition, Ibrutix triggers anti-tumor immunity, enhancing the protective properties of the whole body. Thus, Ibruksen acts on the cells of the malignant tumor, inhibiting and blocking the spread of the disease. Ibrutix is ??approved by the Russian Ministry of Health and has been used by oncologists since 2016.

Description Ibrutix (Ibrutinib 140 mg)

Each package of the medicine contains 120 tablets. The oblong, oval capsules of Ibrutix contain 140 mg of ibrutinib, which acts on the growth of cancer cells by blocking their proliferation. The drug is metabolized during the day and excreted by the kidneys and intestines.

Indications and methods of application

Ibrutix tablets are used as the main or additional agent in the treatment of oncological diseases of the circulatory system. The course provides for a single dose of the drug. According to the instructions, tablets with a single dose of ibrutinib are taken at the same time of day, shortly before a meal or immediately after a meal. The daily dose is equal to one tablet; in exceptional cases, the attending oncologist may revise the dosage of the medication.

Contraindications

The drug Ibrutix is ??not recommended for use in case of individual intolerance to ibrutinib, in case of malfunctioning of the liver and kidneys, as well as for children under 18 years of age.
