

Laennec Injection Reviews

Laennec injection solution has a unique composition, which includes compounds natural for the human body. The drug is a hydrolyzate of the human placenta - a substance purified from viruses and pathogenic bacteria, which stimulates the body without chemical action. Throughout the history of the use of the drug, not only patients, but also doctors, who recommend a remedy for the restoration of the liver, immunity, as well as for general strengthening and rejuvenation, respond positively about it.

Description of Laennec

Laennec is a solution for injection, packaged in 2 ml ampoules. Each dose contains 112 milligrams of human placenta hydrolyzate. Ampoules with the drug are packaged in 10 and 50 pieces per package.

Purpose and methods of use

The drug is prescribed by the attending physician for fatty liver disease, acute and chronic viral hepatitis, cholangitis, cirrhosis and some other liver diseases. Also Laennec is used as an immunomodulator, cosmetic and anti-aging agent. The drug is administered intravenously or subcutaneously in a clinical setting and under the supervision of a specialist.

Contraindications Laennec

Laennec injections are not recommended for pregnant and lactating women, children, as well as persons with individual intolerance to the components of the drug.
