Description

Basic information about the drug SorafekastDescription SorafekastOrder, delivery and payment Sorafekast

The drug Sorafekast has a pronounced anti-tumor effect. It slows down the development of cancer cells, which is necessary for cancers that develop in the cells of the liver and kidneys. The active ingredient is sorafenib, the international name and spelling of the drug Sorafekast.

Buy Sorafekast

Patients can buy Sorafekast in our online pharmacy. We always have the amount of medication required for the course of treatment.

Sorafekast price

It is an effective generic drug produced by the Indian company Aprazer HealthCare. Due to the fact that the production of generics requires much less financial costs than the manufacture of original drugs, the cost of such drugs is much cheaper, and they work just as well. We also work directly with manufacturers, so the price of Sorafekast in our pharmacy is quite acceptable for patients who need regular therapy.

Sorafekast Reviews

Patient reviews about Sorafekast are positive. If you take it as directed by the attending physician, observing the established dosage regimen,

after 2-3 weeks you can notice a persistent improvement in health.

Sorafenib (200 mg in each tablet) is an active active ingredient of the drug related to multikinase inhibitors. Its effect on the cells of malignant tumors is targeted, it does not destroy healthy tissues, so the side effects of the drug are minimal. Sorafenib prevents the further development of the malignant process, thereby improving both the health status and the general quality of life of patients.

Description of the drug Sorafekast

The tablets are packaged in a light-colored plastic jar with a brightly colored label showing the Indian company logo. The package can contain 20 or 120 tablets. The jar is screwed on with a tight lid.

Sorafekast: indications for use

Treatment of malignant tumors: renal cell carcinoma, hepatocellular carcinoma, malignant processes in the thyroid gland, resistant to treatment with radioactive iodine. Prescribing scheme of the drug: two tablets twice a day after meals. Take tablets without chewing with water. If necessary, the doctor adjusts the established treatment regimen.

Sorafekast: contraindications

Do not take Sorafekast to pregnant women, breastfeeding children, children under 18 and people with allergic reactions to the drug. It should be carefully prescribed to patients with a history of heart attacks, blood clotting problems, and angina pectoris.
