Description

Basic informationDescriptionOrder, delivery and payment

Zidolam (Zidolam) belongs to a group of drugs in the class of rivertase inhibitors. The drug contains zidovudine and lamivudine as active active ingredients. Due to their complex effect, the drug effectively copes with the treatment of HIV infection. The medicine is produced by the Indian pharmaceutical company Hetero, the international name is Zidolam.

Buy Zidolam

Patients can buy Zidolam in our online pharmacy by filling out an application. We work directly with suppliers, so we always have the necessary amount of the drug for everyone who needs constant and intensive treatment.

Zidolam: price

Since Zidolam is an Indian generic, the cost is affordable for everyone. Generics have the same effective effect as the original drugs, with minimal costs for their manufacture by pharmaceutical companies. This determines the availability of therapy for all categories of HIV-infected.

Reviews on Zidolam

Patients respond positively to Zidolam. Sometimes, especially at the beginning of the course of treatment, side effects (fatigue, nausea, headaches) can be observed, but over time, the body adapts to the active ingredients of the drug. Already a few weeks after regular admission, patients notice a significant improvement in their condition and the disappearance of unpleasant symptoms.

Zidolam is produced in the form of tablets, which are coated with a film. White colour. The tablets are made in the form of capsules marked H and 2.

Description of the drug Zidolam

The action of the three active substances contained in the drug is aimed at inhibiting the reproduction of the virus in the human body and preventing its further spread. The effective antiviral formula of the drug acts as quickly as possible.

Zidolam: indications for use

HIV infection, but Zidolam is not suitable as a monopreparation. That is why it is prescribed only by the attending physician - as a rule, in combination with other antiviral drugs. The scheme established by the doctor must be adhered to constantly, in order to avoid serious side effects and complications.

You need to take it orally, 1 tablet per day, regardless of food intake. The pill is swallowed whole, without chewing, with water. Mixing of the drug with food is allowed.

Contraindications to the use of Zidolam

Contraindications for use are as follows:

- children weighing less than 14 kg;
- breast-feeding;
- allergic reactions to the drug;
- severe hepatic impairment;
- renal failure;
- anemia with low hemoglobin levels.

The medicine is carefully prescribed to the elderly, as well as to patients with mild and moderate liver dysfunctions. Pregnant women can take it, but only during the first trimester.
